

***“Alesco is for students who just don’t seem to fit into traditional classrooms. They work as a core crew in a class that is no larger than 15 – 20 in total.”***

***“They form strong relationships with each other and teachers and this keeps them engaged and enthusiastic.***

***It works because they all work together to reach a common goal, which is the School Certificate,”***

To enrol you must fill out an application form and attend an interview. To make an appointment visit ACE North Coast at

## **How to Enrol**

# **Just what you’ve been looking for . . .**

**Want to create a future for yourself?**

**But just not cut out for the traditional school system?**

**Why not consider doing your Year 10 Certificate with ALESCO?**

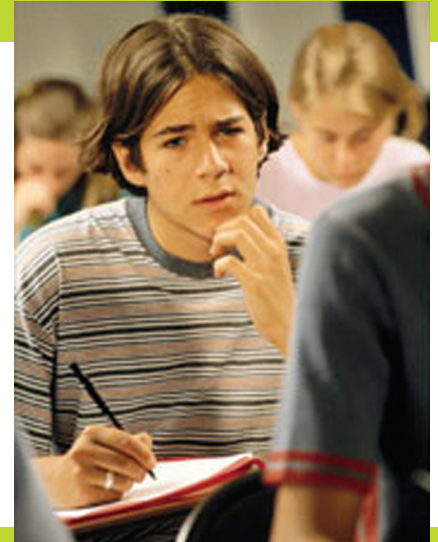

# **. . . an alternative way to do Year 10**

# Your chance to do Year 10

ALESCO Learning Centre is a registered and accredited non-government school designed for young people who have been unable to complete studies in the mainstream schools.

The greatest difference between us and many other alternative education settings is that we treat you like an adult. We give you choices, independence and respect and we let you be accountable for your results. Being in a smaller class means that you get the chance to find out what your strengths are and to improve the areas in which you might lack confidence. You get to call your teachers by their first names and you don't have to wear a uniform.

## Subjects

You complete the following subjects in the Year 10 School Certificate:

**Maths**

**English**

**Science**

**Human Society and its Environment**

**Health and Physical Education**

**Work Education**

All subjects are compulsory for all students.

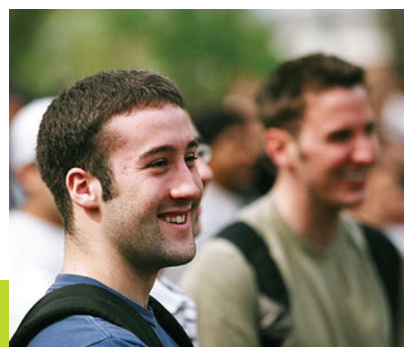

Our staff delivers our program with enthusiasm and creativity, making it relevant and interesting to our students.

## Our philosophy

ALESCO is Latin for maturity through growth. This is a core philosophy in our school.

**A**ccountability  
**L**earning  
**E**ngaging  
**S**uccess  
**C**ooperation  
**O**pportunity

ALESCO students make choices and success is up to the individual.

It's not about your history, but about how badly you want a future. We believe that the more you put in, the more you will get out.
